GOV. SCOTT ISSUES UPDATE ON DEPARTMENT OF TRANSPORTATION PROGRESS IN LEON COUNTY

TALLAHASSEE, Fla. – Today, Governor Rick Scott issued the below update on the Florida Department of Transportation's (FDOT) progress in recovery efforts following Hurricane Hermine. Since Friday, September 2nd, FDOT has been working non-stop to do the following:

- Clear debris such as downed trees and fallen tree limbs
- Install 200 generators in the Tallahassee area to support the operation of traffic signals
- Perform road and bridge assessments

Last night, the City of Tallahassee accepted Governor Scott's offer for additional contractors from private companies to help the city restore power. These companies are working side-by-side with FDOT personnel and are currently working to remove downed trees and fallen tree limbs, as well as other debris that impact downed power lines in Tallahassee. These contractors are also providing over-line support to the debris removal crews. The crews began work today across the city and are being paid for by state funds.

The following table details the progress made by the crews to clear debris and help power restoration efforts since beginning work this morning:
